EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

1. Claims 1-22 and 24 (renumbered claims 1-23) are allowed.
2. The following is an examiner's statement of reasons for allowance:

Regarding claim 1, the primary reason for allowance is that the prior art fails to teach or reasonably suggest a vehicle with at least one lockable entry portal and portal unlocking functionality, at least one partially light transmissive user finger engagement surface accessible from outside the chassis, and a two dimensional imaging sensor viewing the finger engagement surface from a location inwardly of the finger engagement surface for sensing light from illuminator scattered by a users finger, and a data entry process providing data entry input to the portal unlocking functionality.

As for claim 7, the primary reason for allowance is that the prior art fails to teach or reasonably suggest an access control apparatus for use with a vehicle having lockable entry portal and portal unlocking functionality and also including a partially light transmissive user finger engagement surface accessible from outside the chassis, a two dimensional imaging sensor viewing the finger engagement surface from a location inwardly of the finger engagement surface for sensing light from illuminator scattered by a users finger, and a data entry process providing data entry input to the portal unlocking functionality.

With regard to claim 13, the primary reason for allowance is that the prior art fails to teach or reasonably suggest an access control apparatus for use with an enclosure having at least one lockable entry portal and portal unlocking functionality and also including a partially light transmissive user finger engagement surface accessible from outside the enclosure, a two

dimensional imaging sensor viewing the finger engagement surface from a location inwardly of the finger engagement surface for sensing light from illuminator scattered by a users finger, and a data entry process providing data entry input to the portal unlocking functionality.

Regarding claim 19, the primary reason for allowance is that the prior art fails to teach or reasonably suggest that the data entry device also includes an illumination director cooperating with the illuminator for providing an illumination beam generally parallel to the finger engagement surface.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
